Customer Problem Statement

Statement Element	Customer Perspective
I am (Customer)	A patient who needs diagnostic tests and appointments.
I'm trying to	Book tests and appointments easily, track test progress, and access reports online.
But	Booking may require staff assistance, and it can be difficult to know appointment, sample, or report status.
Because	Patient details, appointment records, test statuses, and laboratory reports may be maintained separately, while booking and updates may rely on manual processes.
Which makes me feel	Inconvenienced, frustrated, and uncertain about appointment and report availability.

Problem Statements

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A patient who needs diagnostic services.	Book tests and appointments and check report readiness.	Booking can involve waiting or staff assistance, and report status may not be readily available.	Diagnostic booking and report updates may be handled manually, requiring patients to contact the center.	Inconvenienced and uncertain.
PS-2	A receptionist, lab staff member, or administrator.	Manage patient records, appointments, sample processing, and report delivery efficiently.	Information may be scattered, making the complete diagnostic process difficult to track.	Patient, appointment, test, and report records may be maintained separately, with status updates handled through different processes.	Overloaded and concerned about delays or missed updates.

Customer Problem Statement

Diagnostic centers often struggle to manage patient registrations, test bookings, sample processing, and report delivery through manual methods. Patients may experience long waiting times and inconvenience while booking diagnostic tests and appointments. Patient details, appointment records, test statuses, and laboratory reports may be maintained separately, making it difficult for staff to track the entire diagnostic process. Patients may also need to contact the center repeatedly to check whether their reports are ready.

Proposed Direction

The Medical Diagnosis Center by Service Portal (ServiceNow) provides a centralized digital platform for managing diagnostic services. It enables patients to register, book tests and appointments, track test status, and securely access reports online. Lab staff can manage samples and update test results, while administrators oversee operations through the portal.

The solution aims to reduce manual work, improve record management, minimize delays, and provide patients with a smooth and convenient diagnostic service experience.

Customer Need Summary

- Patients need convenient booking for diagnostic tests and appointments.
- Patients need clear status tracking and secure access to reports.
- Lab staff need a way to update sample processing and test progress.
