IDEATION PHASE

Brainstorm & Idea Prioritization

Date	25-09-2026
Team ID	
Project Name	Medical Diagnosis Center by Service Portal (ServiceNow)
Maximum Marks	4 Marks

Brainstorming and Idea Prioritization

Brainstorming encourages team members to contribute ideas, identify the problem, and organize possible solutions. The following ideation document applies the Brainstorm & Idea Prioritization structure to the Medical Diagnosis Center project.

Step 1: Team Gathering, Collaboration and Problem Statement

Problem Identification

Problem Area	Identified Issue
Manual booking	Patients may need staff assistance to book diagnostic tests and appointments.
Scattered records	Patient, appointment, and test information can be difficult to track in one place.
Report delays	Patients may need to contact the center to know whether their reports are ready.

Problem Statement

The diagnostic center needs a centralized ServiceNow Service Portal to simplify test and appointment booking, organize patient and laboratory records, and help patients and staff track sample processing and report availability.

Step 2: Brainstorm, Idea Listing and Grouping

Brainstormed Features

Idea	Feature / Solution	Group
Idea 1	Patient registration and profile management	Patient Portal
Idea 2	Diagnostic test catalog and test selection	Appointments & Tests
Idea 3	Appointment booking and status tracking	Appointments & Tests
Idea 4	Lab staff workflow for sample collection and status updates	Lab Workflow
Idea 5	Digital report generation and secure viewing/download	Reports & Dashboard

Idea	Feature / Solution	Group
Idea 6	Admin dashboard for bookings, patients, tests, and pending reports	Reports & Dashboard

Key Objectives

- Simplify diagnostic test and appointment booking.
- Maintain patient, appointment, and laboratory records in one system.
- Improve tracking of sample processing and report status.
- Provide convenient patient access to diagnostic reports.

Step 3: Idea Prioritization

Features are grouped by priority according to the project's stated implementation needs.

Priority	Feature	Reason
High	Patient registration, test catalog, and appointment booking	Core functions for patients to request diagnostic services.
High	Sample processing and report status	Allows lab staff to update progress and patients to track reports.
Medium	Reports and dashboard	Helps users view reports and administrators monitor operations.

Implementation Map

The implementation map groups the proposed work into the three feature areas identified in the reference document.

Implementation Phase	Included Features	Priority
Phase 1 – Patient Portal	Patient registration and profile management	High
Phase 2 – Appointments & Tests	Diagnostic test catalog, test selection, appointment booking, and status tracking	High
Phase 3 – Lab Workflow	Sample collection workflow and sample status updates	High
Phase 4 – Reports & Dashboard	Digital report generation, secure viewing/download, and admin dashboard	Medium
