PROJECT DESIGN PHASE – II

Solution Requirements (Functional & Non-functional)

Date	25-09-2026
Team ID	
Project Name	Medical Diagnosis Center by Service Portal (ServiceNow)
Maximum Marks	4 Marks

Functional Requirements

Following are the functional requirements of the proposed Medical Diagnosis Center ServiceNow Service Portal.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Patient Registration	Registration through portal form; capture patient details; validate required fields; create patient profile.
FR-2	User Login & Confirmation	Secure login using registered credentials; confirmation through email or OTP where configured; show validation messages.
FR-3	Diagnostic Test Catalog	Display available diagnostic tests, descriptions, preparation instructions (if provided), and test charges.
FR-4	Appointment Booking	Select diagnostic test, preferred date, and available time slot; create booking; prevent booking of unavailable slots.
FR-5	Booking Confirmation & Tracking	Show booking reference and appointment details; allow patients to view upcoming and past appointments and their status.
FR-6	Sample Collection Management	Allow authorized lab/reception staff to view scheduled bookings and update sample collection status and details.
FR-7	Test Processing & Status Updates	Allow authorized lab technicians to update test progress, such as sample received, processing, and completed.
FR-8	Diagnostic Report Management	Allow authorized staff to attach or enter completed reports and link each report to the correct patient and test.
FR-9	Patient Report Access	Allow patients to securely view or download their own completed diagnostic reports.
FR-10	Payment Tracking	Record and display payment status for a diagnostic booking; support configured payment handling or mark payment at center.
FR-11	Notifications	Provide configured appointment confirmations and sample/report status notifications through email or portal alerts.
FR-12	Admin Dashboard & Management	Allow administrators to manage users, test details, appointments, records, and view pending bookings, samples, and reports.

Non-functional Requirements

Following are the non-functional requirements that describe the expected quality attributes of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The portal should provide a clear, simple, and consistent interface so patients and staff can complete tasks with minimal guidance. Forms, booking steps, and report access should be easy to understand.
NFR-2	Security	The system should require authenticated access, apply role-based permissions, and restrict patient records and reports to the patient and authorized staff. Sensitive information should be handled securely.
NFR-3	Reliability	The system should save booking, sample, test, and report updates accurately and consistently. It should provide clear error messages and avoid duplicate or incomplete records where possible.
NFR-4	Performance	Common actions such as login, viewing tests, booking appointments, and opening dashboards should respond within a reasonable time under normal usage.
NFR-5	Availability	The portal should be accessible to authorized users whenever the ServiceNow instance is available, with planned maintenance communicated where applicable.
NFR-6	Scalability	The solution should support growth in patient accounts, diagnostic bookings, test records, and reports without requiring major changes to the overall design.
