ACCEPTANCE TESTING

UAT Execution & Report Submission

Date	26-09-2026
Team ID	
Project Name	Medical Diagnosis Center by Service Portal (ServiceNow)
Maximum Marks	4 Marks

1. User Acceptance Testing Summary

The UAT report evaluates the main user-facing workflows of the Medical Diagnosis Center Service Portal, including patient registration, diagnostic test selection, appointment booking, status tracking, sample processing, report access, and administrator record management.

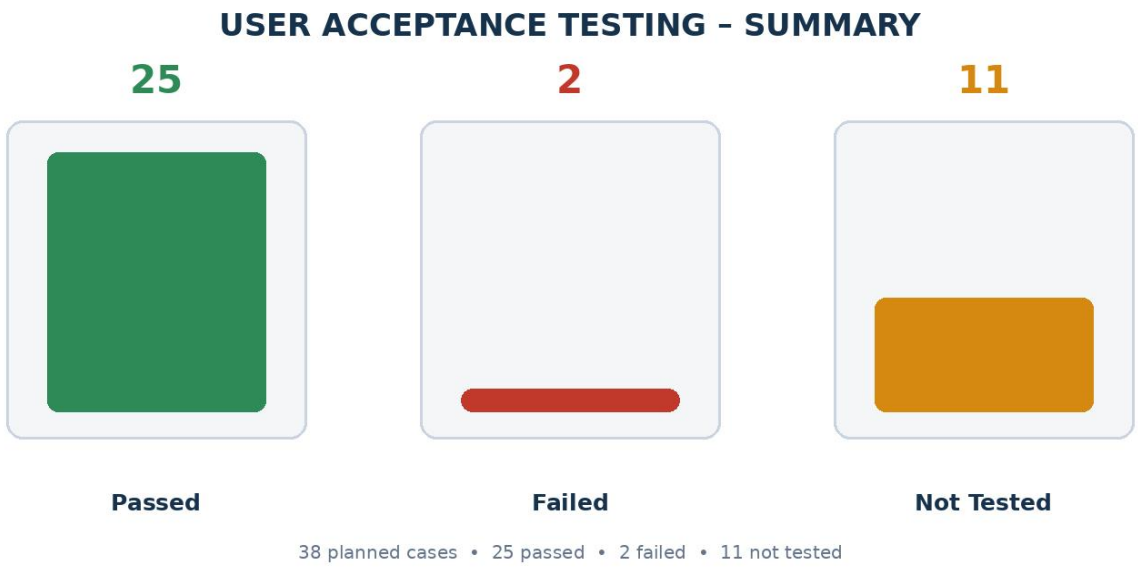

Figure 1. UAT execution summary based on the sample results in the supplied reference.

2. Test Case Analysis

Section / Validation	Total Cases	Not Tested	Fail	Pass	Severity of Issue(s)	Section / Validation Details
Patient Registration	5	1	0	4	—	Valid registration, mandatory fields, and profile record checks
Diagnostic Test Catalog	5	1	0	4	—	Test list visibility and diagnostic test details
Appointment Booking	8	2	1	5	Medium (1)	Booking form, required fields, and appointment submission
Appointment Status Tracking	4	1	0	3	—	Patient can view booking and current status
Sample Processing	5	2	0	3	—	Lab staff can update sample and processing status
Test Results & Report Access	6	2	1	3	High (1)	Report attachment, completed status, and authorized access
Admin & Record Management	5	2	0	3	—	Manage test records, bookings, and patient

						records
TOTAL	**38**	**11**	**2**	**25**	**2 issues listed**	**Overall UAT**

3. Sample Defect / Severity Summary

Defect / Observation	Severity	Status	Suggested Action
Appointment submission validation issue (sample entry)	Medium	Open / to verify	Check mandatory fields and booking submission behavior.
Unauthorized report access check (sample entry)	High	Open / to verify	Verify role and record-level access before release.

4. UAT Execution Result

- Total planned test cases: 38.
- Sample execution result: 25 Passed, 2 Failed, and 11 Not Tested.
- Two sample issues are recorded for follow-up: appointment submission validation and unauthorized report-access verification.
- Before final release, all not-tested cases should be executed and the failed cases should be retested after fixes.
